About BeatJam

1

BeatJam allows you to create high quality music files from audio CDs, play and organize files on your PC. You can also transfer those files to audio devices that support "OpenMG" and "MagicGate" (copyright protection technologies). BeatJam adopts OpenMG. Enjoy recording and playing music without infringing on their copyrights.

2

◆ Recording and playing audio CDs

You can create music files in OpenMG format from audio CDs and play files on your PC or transfer to compatible audio devices. Music can be recorded to MDs and other media.

3

◆ Categorizing and managing music files automatically

Files are sorted by album, artist and genre. You can create a playlist.

4

◆ Using music files stored on your PC

Music files in MP3 and WAVE format can be played and controlled with BeatJam. You can convert these files to OpenMG format for checking out to other devices.

5

◆ Listening to recorded and managed music on your audio device

Check out music files to OpenMG compatible audio devices. You can transfer music recorded with BeatJam from an audio CD up to three times. The order and titles of files can also be changed.

About copyright -OpenMG-

1

Music is protected by copyright law. Audio CDs and broadcasted music can be copied for personal use only.

It is prohibited to distribute or broadcast copies or publish your music copies on the Internet without permission of the copyright holders (including the record companies).

Please respect the copyright law when using BeatJam music files.

2

◆ What is “OpneMG” copyright protection technology ?

Copyright protection technology which is used when creating and playing music files. Data are encrypted to disable transferring to other PCs and illegal distribution on the Internet.

3

About copyright -OpenMG-

4

5

6

6

OpenMG files recorded from audio CDs can be transferred up to three times. Check in files to the source PC to check them out to other devices or media.

1

◆ Restrictions based on OpenMG's copyright protection

BeatJam employs OpenMG. The following restrictions are applied to music files recorded or edited by BeatJam.

- Music files recorded with BeatJam can only be played on the source PC.
- Even if you copy files transferred to external devices or media, files cannot be played back on other PCs.
- Files transferred to external devices or media can only be checked in to the source PC.
- Certain conditions (playing period, count) may be applied, depending on the copyright holders or service providers.

Installing BeatJam

◆ Before you begin

1

See the table below for the system requirements, especially free space and memory.

2

OS	Windows® XP Home Edition*1/ Professional*1	Windows® Millennium Edition	Windows® 98 Second Edition	Windows® 2000 Professional*1
CPU	Pentium® II 300 MHz or higher (MMX® Pentium® 233 MHz minimum)	MMX® Pentium® 233 MHz or higher (MMX® Pentium® 200 MHz minimum)		MMX® Pentium® 233 MHz or higher (MMX® Pentium® 200 MHz minimum)
Memory	128 MB or more (64 MB minimum)	64 MB or more		64 MB or more
Others	<ul style="list-style-type: none"> ● Display...1024 x 768 resolution, High Color or upper ● Sound source...Sound card 			

3

Before you begin

4

*1 To use this software, login as system administrator (computer administrator).

5

Installing BeatJam

Hard disk space

120 MB or more

* Additional space is required to store music data.

* The required space depends on the format or reserved space.

6

- USB ports are required to connect with external devices or media. The operation via USB hub is not guaranteed.
- Depending on the driver or CD-ROM drive, audio CDs may not be recorded.
- Operations are not guaranteed when using BeatJam
 - on dual-boot computers.
 - with other music software simultaneously.
 - with different version simultaneously.
 - You cannot use BeatJam with programs that create virtual CD-ROM drives.
 - You cannot use BeatJam when more than one OpenMG compatible audio device is connected.

8

TINSE0553AWZZ

◆ Installation

Plugin and USB driver required for transferring music files are also installed along with BeatJam.

1. Insert **BeatJam CD-ROM** into the CD-ROM drive.
Setup application appears.

2. Click **Beat Jam Setup**.
Setup starts.
Follow the instructions on the screen.

Tip

Installation does not start even if CD-ROM is inserted
If the setup application does not appear, perform the following.

1. Click **Windows [Start] button** and select **[My Computer]**.
Double click **[My Computer]** on the desktop if you use Windows® Me, 98SE or 2000.
2. Right click on  **[OMGBJ]** indicating CD-ROM drive and select **[Open]** from the menu.
3. Double click **AUTOPLAY.EXE** from the list.

Caution

Windows® XP/2000

User with Administrator* rights needs to log on. Confirm with the network or computer Administrator if you are in a workgroup.

* User name in Administrator or Administrators group under Windows® 2000.

Caution

For Windows® XP and Me user

When you use the "System Restore" system tool in Windows® XP or Windows® Me, all the music files that you recorded or imported may become unplayable.

Please back up all your music files using the Backup Tool before executing "System Restore".

Caution

If a previous version of OpenMG Jukebox* or SonicStage* is currently installed on your computer

OpenMG Jukebox or SonicStage should be upgraded. The screen appears to prompt you to upgrade the software. Click [Continue] to proceed.

* OpenMG Jukebox and SonicStage are softwares of Sony Corporation.

Caution

Hard disk contains old BeatJam database

You can select to reuse or delete the database during setup.

Caution

Do not play BeatJam setup CD with audio devices

Loud noise may damage your hearing and speakers.

Tip

Keep CD-ROM handy

BeatJam setup CD will be used for reinstallation. Keep it after the installation.

Tip

Uninstalling

1. Click Windows [Start] button and select [All Programs*1 - Justsystem - BeatJam - BeatJam Uninstall].

2. Click [Yes] on the confirmation screen.

Uninstallation starts.

*1 [Program] under Windows® Me/98SE/2000.

You can also delete from [Change/Delete] under [Control Panel - Add/Delete Programs]*1 in Windows [Start]*2 menu.

*1 For Windows® Me/98SE/2000, delete from [Setting - Control Panel - Add/Delete Programs].

*2 For Windows® Me/98SE, delete from [Installation/Delete].

◆ Launching and quitting BeatJam

Start BeatJam after the setup.

◆ Launch BeatJam

Close other OpenMG applications or music softwares.

1. Double click  [BeatJam] on the desktop.

Click Windows [Start] button and select [All Programs* - Justsystem - BeatJam - BeatJam].
 * For Windows® Me/98SE/2000, start from [Program].

◆ Quit BeatJam

You can exit either from the main player or the mini player.
The player from which you exit will appear next time.

- Main player ▶ See “Main player” on P. 24.

1. Click  on the upper right of the screen.

Click

- Mini player ▶ See “Mini player” on P. 32.

1. Click .

Click

11

Using BeatJam

Recording audio CD to MD

Data can be recorded on a PC and other medium at the same time.

1 Entering information

1. Start BeatJam.

▶ See "Launch BeatJam" on P. 11.

2. Click **CD** at the top of the main player.

CD panel appears.

3. Insert an audio CD to CD drive.

Click  if started automatically.

The audio CD information appears automatically.

4. Click **[Album Title]** and enter a name.

Click and enter a name

5. Click **[Artist]** and enter a name.

6. Click **[Genre]** and enter a genre.

Or click the rightmost  and select from the list.

7. Select a song from the list.

Recording audio CD to MD

Using BeatJam

8. Click [Title] and enter a name.

9. Press the **Enter** key.

The title is set.

10. Repeat steps 7 to 9 if necessary.

2

3

4

5

6

Recording audio CD to MD
Using BeatJam

Caution

First time use

When setting an audio CD for the first time, drive check will be performed to see if an audio CD is played or recorded properly.

The following CDs will not be checked.

- 8 cm CD
- The second last song is less than 90 seconds
- CD containing extremely low sounds

13

BeatJam_E

TINSE0553AWZZ

2 Recording

1. Select songs and check the boxes .

Only checked songs are recorded.

2. Insert the MD.

3. Click [Rec to] and select [Library + Net MD].

4. Select the recording mode from LP SP.

▶ See "To set MD recording mode" on P. 15.

5. Select the bit rate from 132k 105k 66k.

The higher the rate, the better the sound quality.

If LP in step 4 and 132 or 105 kbps in the bit rate are selected, the mode is set to LP2 (priority on the sound quality).

If LP and 66 kbps are selected, the mode is set to LP4 (priority on the recording time).

6. Click .

Recording to CD and checking out to MD start at the same time. You can see the status on the screen.

The screen closes when finished. A playlist is created and you can manage the recorded songs in the library.

▶ See "Playing a playlist" on P. 19.

Recording audio CD to MD

Using BeatJam

14

Caution

Free space

Check that the external device has enough free space before transferring data.

You cannot check out if the space is insufficient.

Tip

Sound is heard from the connected device

If an audio device is connected, the play sound may be heard from that device.

You can change the output to PC, except for songs recorded on Net MD compatible devices.

Tip

To set MD recording mode

You can select LP (stereo long time recording) or SP (stereo recording). LP mode has 2 types and is set depending on the bit rate (LP2 and LP4).

Recording mode

- **LP2**
For better sound quality. The recording time is twice as long as SP. You can play on MDLP compatible players.
- **LP4**
For longer recording time. The recording time is 4 times of SP. You can play on MDLP compatible players.
- **SP**
Standard stereo recording.
You can use MDLP non-compatible players.

Glossary

This section describes the terms related to BeatJam. Refer to the glossary in Help for the ones not listed below.

ATRAC3

Audio compression technology developed by Sony Corporation that satisfies both the high sound quality and high compression rates. The compression rate is about 10 times higher than that of the audio CDs, allowing users to reduce file sizes.

Net MD ▶ P. 14

This is an interface standard for connecting MD devices to a PC via USB. Net MD employs copyright protection technologies which enable high speed transfer of encrypted data.

OpenMG ▶ P. 6

This is a copyright protection technology used to create or play music files on PCs.

Using BeatJam, a software compliant with OpenMG, music data is encrypted before storing to a PC and can be played on that PC. OpenMG also prevents unauthorized distribution of data via the Internet.

SDMI

This is a forum consisting of music, computer and other related companies or organizations. The aim is to develop the integrated copyright protection technology for digital music. OpenMG is compliant with SDMI standard.

Check In/Check Out

▶ P. 6, 20, 22, 31

“Check Out” is to transfer music files managed by OpenMG compatible software to an external devices/media. Returning the music files to the PC is called “Check In”.

BeatJam allows you to check out a music file recorded from an audio CD three times.

Checked out copies cannot be checked in to other PCs.

Playlist ▶ P. 17, 19

A list of music files. All the songs are played in the order you arranged them.

BeatJam creates a playlist when you record music files from CD.

Library ▶ P. 16, 28

Music files recorded from audio CDs are stored in the Library. Files in a PC can also be moved to the Library. Stored music files are categorised into 4 types (All songs, Album, Artist and Genre). It is very useful to search the desired song.
